Academic Fest – Mednova 2023

Event: Mystery Murder Game

Date:

As part of the Academic Fest Mednova 2023, the Department of Forensic Medicine, MMC organised a “Mystery Murder Game”, designed to provide students with an immersive, hands-on experience of crime scene investigation.

A realistic and meticulously detailed crime scene was created, allowing participants to observe, analyse clues, investigate the scene and experience the challenges and excitement associated with an actual crime scene investigation. The attention to detail and realistic presentation created an engaging atmosphere that stimulated the participants’ senses and added an element of suspense and thrill to the activity.

The event received an enthusiastic response from the students, with participation exceeding the initial expectations. Students actively engaged in the investigation and demonstrated considerable excitement and curiosity throughout the activity. Prizes were awarded to all teams that successfully completed the game, acknowledging their participation and investigative efforts.

The event received highly positive feedback from students, faculty members and staff who visited the crime scene. The overwhelming response highlighted the effectiveness of the activity as an innovative and enjoyable method of promoting interest in forensic medicine and crime scene investigation.

Outcome:

The Mystery Murder Game successfully provided an interactive and memorable learning experience, while generating significant enthusiasm and interest in forensic medicine among the participants and visitors.
