

Report on Autopsy Visit

Institution : Government Medical College Kannur, Pariyaram

Date of Visit : 25th July 2025 – 2nd August 2025

Batch: MBBS Batch 2022 (208 students) divided into batches of 30 students for each day.

Accompanied by: Faculty members of Department of Forensic Medicine, Malabar Medical College Hospital & Research Centre, Calicut.

During the visit, students witnessed and studied a wide spectrum of medico-legal autopsies, including Hanging, Drowning, Road Traffic Accident (RTA), Sudden Death due to Myocardial Infarction, Seizure-related Obscure Autopsy, Decomposed Body, Fall from Height and Poisoning.

The autopsy visit was an enriching academic experience. It provided students with hands-on exposure to medico-legal autopsies, bridging the gap between theory and practice in Forensic Medicine. Importantly, this visit was undertaken to overcome the lacunae arising from the absence of autopsy facilities in our own college, thereby ensuring that students do not miss out on essential practical training. Viewing autopsies is a mandatory part of the MBBS curriculum, and this program successfully fulfilled that requirement while enhancing our understanding of the medico-legal responsibilities of a medical practitioner.
