

Biportal Spine Endoscopy Course

In a significant advancement for medical education and minimally invasive spinal surgery in the region, Malabar Medical College Hospital & Research Centre successfully hosted a two-day specialized program. The event marked the **First Cadaver Workshop** conducted under the aegis of the **World UBE Society - Indian Subcontinent**.

The highly technical program, titled the "**Biportal Spine Endoscopy Course**," took place on **July 4th and 5th, 2026** at the state-of-the-art **Anatomy Lab** located within the **Malabar Medical College campus in Ulliyeri, Kozhikode**.

The intensive course was designed to provide orthopedic and neurosurgeons with deep insights into cutting-edge endoscopic spine techniques. The curriculum featured a comprehensive mix of:

- **Surgical Demonstrations:** Live or guided walkthroughs of complex biportal spine endoscopy procedures.

- **Hands-on Training:** Practical, real-world experience conducted directly on human cadavers, allowing participants to refine their skills under expert supervision.

The event was organized in collaboration with prominent medical organizations, featuring key partnerships with:

- **The World UBE Society (Indian Subcontinent)**
- **Radical Academy of Spine Endoscopy**

By hosting this prestigious subcontinental event, Malabar Medical College Hospital & Research Centre continues to solidify its reputation as a leading hub for advanced medical research and specialized surgical training.
